A new tab called "Productivity" allows you to easily toggle between the two. For a full list of enhancements, please check out our New Features White Paper. Enhanced Modeling {#elements\_20\_4\_enhanced\_modeling} ===== elements now includes "Enhanced Modeling", a family of tools to help you work more efficiently with modeling geometry. As shown in the figure below, "Properties" allows you to quickly access a list of attached elements. "Edit" gives you access to the element editing tools in Annotation. "Proportional Editing" provides direct proportional editing control for faces, edges, and polygonal meshes. "Fit" gives you access to the feature that allows you to adjust the scale of faces. And "Fit" also gives you access to "Edge Contraction", a feature designed to ensure that faces with multiple edges do not expand to fill a polygonal surface. ![How to access enhanced modeling features](../..../images/bf/elements/Create Modeling Features/properties.png "Properties")
